

Aspen Mountain View Homeowners:

Due to our current severe drought conditions and the impact of summer irrigation use, the Homeowner Association (HOA) Board of Directors is asking each homeowner to begin conserving water in order to maintain the adequacy of our community water system supply for household use and water storage for fire protection effective immediately.

Please use the following guidelines:

1. Home addresses ending in an **Odd number** use irrigation water only on Wednesday, Friday, and Sunday.
2. Home addresses ending in an **Even number** use irrigation water only on Tuesday, Thursday, and Saturday.
3. Newly landscaped areas, vegetable gardens, and flower gardens may water enough to allow them to flourish.
4. No irrigation watering outside your building envelope. Only water trees and bushes as needed.
5. Please use less water if you can.

This request is due to the continuing severe drought. According to outlooks from the National Weather Service, the next few months are anticipated to be abnormally hot and dry.

Please contact me should you have any questions.

Thank you for your participation and patience.

Bob Gardner

Aspen Mountain View Homeowners Association Board of Directors
